Stubbs Lane Cemetery Design Entry Form

Example Description

My proposal is intended to make it easy for people to get around but also a restful place to stop

I have set the design in four triangles, at the centre of which will be a fountain (I would call it the Fountain of Peace) , two flowerbeds and some benches. Trees will add some shade and also add some dimension. People will be able to walk around the cemetery and visit their loved ones and then take some time to sit on a bench and reflect to the sound of water and the smell of blossoms.

Each path could also be named after people in the community. Suggestions could be made to a committee made up of representatives from the Parish and Church councils.
